PRODUCT ENGINEERING

PUBLISHED MONTHLY

McGRAW-HILL PUBLISHING COMPANY, INC. 330 West 42d Street, New York, N. Y.

INDEX TO VOLUME 3

January to December, 1932

January 1-48
February 49-96
March 97-140
April 141-184
May 185-228
June 229-272
July 273-312
August 313-352
September 353-392
October 393-432
November 433-472
December 473-512

* Illustrated

Abrasion and metals 261
Acceleration and velocity. G. F. Nordenholt *273

Aeronautics:
- Aircraft engines 101
- Aluminum alloys in relation to aircraft construction 302
- Autogiro with cabin 6
- Boeing all-metal airplane *357
- Curtiss attack plane *101
- Diesel in lighter-than-air craft *102
- Flying boat with oil engines 53
- Mooring mast for Akron, tripod *8
- Portable beacon transmitter for aircraft landing fields *55
- Rudder, "servo" reduces airplane pedal load *481
- Second National Aircraft Show *216
- Stainless steels in aircraft construction 302
- Turbines for planes 54
- Wind tunnel for research tests *302

Air compressor *54
Air compressor mounted on tractor *318

Air Conditioning:
Air conditioned diners 53
Air conditioned houses 118
- Humidity control 320

Aluminum:
- All-aluminum rail hopper cars 53
- Aluminum alloys 398
- Aluminum alloy applications. G. S. Brady 23
- Designing alloy castings. H. J. Rowe 127
- Heat insulation with metal foil. J. L. Gregg *204
- Specification for aluminum revised 263

American Gear Manufacturers' Assn.:
- Annual meeting 262

American Society for Testing Materials:
- Atlantic City meeting 343

American Society of Mechanical Engineers:
- Meeting of aeronautic division 302

Angle trisector. C. C. Hubbell *128

Appearance and Finishes:
- Artist in industry, what he does and how he works. W. D. Teague *245
- Classification of colors. F. P. Ingalls 409
- Color—materials and behavior in products for indoor service 409
- Color—materials and behavior in products for outdoor service. F. G. Oswald *369
- Color by optics. I. J. Saxl *329
- Color by trial and jury. H. H. Adler. *289
- Color versus form 328
- Color, where and how *113, *157
- Color index for automobiles 8
- Designing for economical polishing. R. T. Kent *474
- Effect of perspiration on finishes. Leo Roon 495
- Engineer considers art in engineering. C. K. Lee *201
- What is color? *65
- What you can do with color. D. R. Dohner, T. J. Maloney, C. D. Barrett, W. D. Teague, H. L. Towle, Nan Hornbeck *17

Appliances, electric. L. E. Moffatt 436

Applied Mechanics:
- Graphical analysis of impact in mechanical movements. G. F. Nordenholt *273
- Inertia forces in cam mechanisms. J. A. Hall *393, *458

Associated Business Papers—meeting 423

Automobiles:
- Artist in industry, what he does and how he works. W. D. Teague *245
- Auburn dual ratio axle drive. H. C. Snow 174
- Budd-Micheline car—rubber tires on steel rails *165
- Ford V-8 engine design. G. F. Nordenholt *185
- Ford's new bus 104
- New York's 1931 automobile salon. Herbert Chase *32
- 1932 cars complicated by conveniences. Herbert Chase *68
- Streamline form and rear mounted engines *53

Automotive industries. G. E. Quisenberry 435

Backlash factor in transmission train. W. M. Pohl *1
Bar of monel metal bent into loop and welded—deflection and stress? *502
Bars, Bending stresses in curved. B. L. Lonngren *298
Beams, hollow tapered. G. P. Casiraghi ... 498

Bearings:
- Ball bearing pillow block *317
- Ball bearing spindle mounting *359
- Ball bearings. H. E. Adams 461
- Balls within rotary feeders of batchers *358
- Bearing cap on cylinder block for crankshaft. I. Patrick 258
- Criteria for the design of bearings. L. J. Bradford 253
- Cylindrical bearings—construction and proportions *161
- Effect of fitting on plain bearing performance. L. J. Bradford *150
- Impact loads. A. B. Asch 213
- Load factor for woodworking machine cutterheads. D. B. Turcott *9
- Low torque applications of ball bearings. D. E. Batesole *97
- Lubrication of ball bearoings. H. E. Adams 501
- Lubrication of small bearings. Herbert Chase *406
- Oil film pressures. L. J. Bradford ... *213
- Oil film pressures. J. A. Hall 213
- Reamed versus fitted bearings. F. B. Faulkner *258
- Roller bearings held in by seal washers *279
- Seals for shaft housings and bearings. L. L. Leach *123
- SKF journal bearings *104
- Threaded pivots and bearings. Arthur Pestel *129

Belts:
- Economical design of belt drives. Emory Kemler *321
- Performance, the only belt criterion. C. A. Norman *145
- V-belt life, overload and pulley diameter. C. A. Norman *248, *291

Belt-conveyor scale with photoelectric integrator *54
Bending stresses in curved bars. B. L. Lonngren *298
Beryllium copper *364
Beryllium copper—cast condition *494
- New beryllium alloy 56
- Progress in light alloys. G. S. Brady 23
- Wrought beryllium copper for electrical parts and springs. K. G. Frank *108

Boiler feed-water regulator *148
Boiler spins at turbine speed *480
Book reviews 95, 140, 184, 226, 270, 310, 350, 390, 430, 470
Boring machine *278
Brackets, arc-welded steel counterweight .. *278

Brakes:
- Capacity of clutches and brakes. Copleston & Hemphill 214
- Clutches and brakes. A. C. Rasmussen 215
- Effect of variable friction in differential brakes. G. W. Mork *197
- Engagement pressures in band clutches and brakes. A. C. Rasmussen *60
- Engagement pressure for brakes on hoists. A. C. Rasmussen *105
- Hoisting-load brake *191
- How can it be done? J. A. Covington *85
- How it can be done *131
- Linkages. C. D. Macy, J. Best, R. A. Sternaman, W. C. Tustin *174
- Linkages for operating bank clutches and brakes. A. C. Rasmussen *73
- Maximum versus minimum pressures in brake bands. L. D. Hagenbook 84
- Maximum versus minimum pressures in brake bands. A. C. Rasmussen 173
- Temperature calculations for clutches and brakes. A. C. Rasmussen *282

Budd-Micheline car—rubber tires on steel rails *165
Building equipment. J. M. Carmody 447
Building houses of steel 102

Buses:
- Duralumin body for bus *192
- Ford passenger buses 8
- Interstate deck and a half coach *52
- Twin Coach can be operated on rails or highway *397

Buying power survey 465

Cams:
- Cam mechaninsm for an adjustable dwell. F. H. Mayoh *209
- Cam problem 463
- Cam problem. L. D. Hagenbook 502
- Inertia forces in cam mechanisms. J. A. Hall *393
- Problem in cams. W. W. Johnson ... 421

Canning machinery at Chicago show *119
Carbon paper eliminated by device 53

Castings:
- Beryllium copper—cast condition *494
- Cast brass and bronze 261
- Designing aluminum alloy castings. H. J. Rowe 127
- Die casting in zinc and brass. G. S. Brady 23
- Highly accurate parts from tin base alloys. H. L. Spaunburg *160
- Hydraulic process plus new alloys for die castings. W. J. During *376

Chain with universal joint *480
Chronolog *400
Clamping shoes and plugs. F. A. Firnhaber *286

Cleveland Engineering Society:
- Product development conference 464

Clocks:
- Big Ben Chime Alarm. W. S. Hawthorne *49
- Warning of appointments 53

Clutches:
- Capacity of clutches and brakes. Copleston & Hemphill 214
- Centrifugal clutches. McDonough & Niederer *337
- Clutches and brakes. A. C. Rasmussen 215
- Cone friction clutch chart. (Ref. Bk. Sheet) 392
- Engagement pressures in band clutches and brakes. A. C. Rasmussen *60
- Engagement pressure for brakes on hoist. A. C. Rasmussen *105
- Ideal friction clutch 419
- Linkages for operating band clutches and brakes. A. C. Rasmussen *73
- Maximum versus minimum pressures. L. D. Hagenbook 84
- Plate friction clutch chart. (Ref. Bk. Sheet) 391
- Roller clutches for feed mechanisms. F. A. Firnhaber *210
- Temperature calculations for clutches and brakes. A. C. Rasmussen *282

Color. See Appearance and Finishes.
Construction and mining equipment. F. E. Schmitt 444
Conveyor for chips *146
Conveyors—Apron conveyor *280
Corrosion of non-ferrous metals tested by Committee 464
Corrosion—resistant steel 175

Coupling with oil circulation....•278
Goupings for glass pipe....•400
Sleeve-type shaft couplings—light and heavy duty....•198
Crane for mounting on tractors....•52
Crusher, "Gyrocentric"....•147
Crushing-screening-loading plant....•358
Cylinders, stainless steel drying.... 7

Deflection Problem:
D. E. Hobart....•462
L. V. Johnson....•341
K. A. Maxwell....•461
H. W. North.... 382
D. J. Reynolds....•381

Design Calculations and Examples:
Belleville springs. W. W. Boyd....•361
Bending moment, shear and reactions of a beam bearing a concentrated load. (Ref. Bk. Sheet).... 27
Chart for overhung shafts. (Ref. Bk. Sheet).... 121
Chart for two bearing shafts of uniform strength. (Ref. Bk. Sheet).. 122
Chart to determine horsepower for hydraulic systems. (Ref. Bk. Sheets) 163
Cone friction clutch chart. (Ref. Bk. Sheet).... 392
Cylindrical bearings—construction and proportions....•161
Designing for economical polishing. R. T. Kent....•474
Economical design of belt drives. Emory Kemler....•321
Embossed hubs in stampings. J. K. Olsen....•326
Factors that affect design of electrically heated devices. J. V. Calhoun....•170
Graphical analysis of impact in mechanical movements. G. F. Nordenholt....•273
Helical springs. (Ref. Bk. Sheets).. 471
Hollow pressed pins. M. V. Zaustinsky 341
Interferometer—precision, one part in thirty-six billion. Henry Simon....•496
Journal friction with boundary lubrication. Nordenholt & Chase....•109
Linkages for operating band clutches and brakes. A. C. Rasmussen....•73
Lubricant properties and their relation to design. Paul Gibbs....•153
Motion study in the design of production equipment. A. H. Mogensen..•213
Motion study in machine tool design. R. C. Bullard.... 379
New angles.... 156
Oil lubrication, principles and some simple methods. Herbert Chase...•57
Plate friction clutch chart. (Ref. Bk. Sheet).... 391
Preferred numbers. R. E. Hellmund....•353, 401
Recurring developments. J. A. Covington.... 252
Roller clutches for feed mechanisms. F. A. Firnhaber....•210
Rotary and accelerated motion. (Ref. Bk. Sheets).... 351
Seals for shaft housings and bearings. L. L. Leach....•123
Shaft design. Emory Kemler....•207
Shaft diameters based on the A.S.M.E. code. (Ref. Bk. Sheets).... 227
Spur gear tooth strength chart. (Ref. Bk. Sheet).... 75
Taper pin applications. F. A. Firnhaber....•242
Temperature calculations for clutches and brakes. A. C. Rasmussen....•282
Tooth contact in spur and helical gears. H. E. Kitchen....•331
Torsional vibration—how to prevent it. D. B. Turcott....•79
Typical designs of stuffing boxes....•25
Detents, retaining and locking pt. 1. Adam Fredericks....•486
Dial indicators for gear lapping machine..•452
Dies: Hydraulic process plus new alloys for die castings. W. J. During....•376
Dimension, projection methods for calculating....•84
Dimensioning. A. C. Layzell.... 421
Dowel embossings for assembling stampings. J. K. Olsen....•412

Drawings:
Better drawings needed. H. A. Pearson....•213
Bills of material. P. Hall.... 259
Clarity in dimensioning. A. C. Layzell 421
Drawing isometric circles quickly. J. E. Hyler....•380
Lettering standards. W. S. Brown.. 382
Lettering standards. A. W. Swain... 420
Pros and cons on bills of material. L. L. Leach.... 300
Scale of isometric radii. J. Homewood.•342
Simplifying drafting work. H. L. Lackman.... 299
Single stroke speed lettering. E. H. Bruce....•498
Standard lettering should be abolished. E. C. Shanks.... 340
Suggested standards for dimensioning drawings. E. C. Shanks.... 259
Dredge uses electricity and oil burner for power.... 400
Drilling, indexing and reaming machine..•399
Drilling machines—hydraulic woodworking drill.... 5

Drives:
Economical design of belt drives. Emory Kemler....•321
Machine drives and controls. L. C. Morrow....•446
Textile printing machines....•190
Vari-speed motor pulley....•234
V-belt drive for deep well pump.... 6
Dryer, rotary....•8
"Durez"—control wheel for lathe....•234
Dynamometer, paradoxical. Frederick Franz 35

Editorials:
Basic knowledge before specialization 64
Engineer and artist.... 473
Engineering intolerance.... 112
Engineering will rise to the occasion 16
Fruits of standardization.... 112
Is it good engineering?.... 156
New methods make new designs.... 112
Open house.... 473
Patents and patent values.... 200
Products and production.... 200
Sad tale of a horn button.... 64
Salary scales and recognition.... 16
Time for sportsmanship.... 64
Victims of habit.... 288
What should be the basis?.... 288
"Where is it used?".... 244
Why are standards not adopted?.... 156
"Electric eye"....•194
Electrical devices for home use.... 55
Electrically heated devices—factors that affect design. J. V. Calhoun....•170
Engineers' Council for Professional Development.... 423

Engineers and Engineering:
National registration for engineers... 465
Plenty of advice but no action. H. F. Williamson.... 85

Engines:
Diesel developments.... 55
Ford V-8 engine design. G. F. Nordenholt....•185
Hill diesel engine in Reo speed wagon.•149
Twelve cylinder horizontally opposed bus engines....•479
Two row radial engine....•192
World's largest diesel....•451
Equations, graphical method for solving. E. N. Kemler....•100
Equation, positive roots of any quadratic. (Ref. Bk. Sheets).... 271
Equations, solving higher degree. N. M. Wickstrand.... 339

Filing—circular files.... 53
Filler cap of three corrosion-resistant materials. S. G. Malby....•82
Food industries' equipment. L. V. Burton 441
Ford V-8 engine design. G. F. Nordenholt.•185
Furnace, oil....•319

Gas bottles replace weighted accumulators.•451
Gate, apron-type....•359

Gears:
Allowable loads on worm gears. J. I. Clower.... 256
Analysis of differential gear trains. F. W. Shaw....•82
Bevel change gears. F. W. Shaw....•173
Change-gear mountings. Adam Fredericks....•324, •366
Data wanted on worm gear drives... 421
Differential, planetary gearing. L. S. Mitchael....•125
Locating gear center.... 463
Locating gear center. J. G. Real. N. Finkelstein & V. T. Anderson.•500, •501
Long and short addendum gears. Earle Buckingham.... 256
Problem in locating centers. J. A. Covington....•422
Spur gear tooth strength chart. (Ref. Bk. Sheet).... 75
Strength of bevel gear teeth. J. I. Clower....•128
Strength of gear teeth.... 262
Tooth contact in spur and helical gears. H. E. Kitchen....•331
What are safe loads on worm gears? E. K. Ambler.... 84
Worm gear capacity. J. A. Covington 299
Worm gear hobs.... 262
Glue, applying. G. A. Swartz....•454
Graph figures by "Cosmograph"....•53

Hammers: Rotary pivoted hammers. H. M. Plaisted....•34
Hardness: Comparison of hardness scales and tensile strength. (Ref. book sheet).... 512
Hardness conversion chart (Ref. book sheet). 511
Heater, electric water....•7
Heating and ventilation show....•117
"Home entertainment"....54, 104
Horsepower and pipe sizes for hydraulic systems. (Ref. Bk. Sheets).... 163
Hubs, embossed, in stamping. J. K. Olsen.•326
Humidifying apparatus control.... 103
Hydraulic systems, chart to determine horsepower for. (Ref. Bk. Sheets) 163

Illium. W. D. Staley....•456
Impact problem. W. F. Humphrey....•381
Impact problem. D. J. Reynolds, N. M. Wickstrand....•499
Indexing, drilling and reaming machine...•399
Interferometer. Henry Simon....•496
Instruments and their application....•334
Insulation with metal foil. J. L. Gregg..•204
International Electrical Congress.... 344
Iron: Gray iron castings specifications revised.... 344

Knitting Arts Exhibition.... 217

Labor eliminator....•104
Light by induction.... 360
Light waves to insure accuracy.... 400
Looms: Silk loom standardization in line.. 5

Lubrication:
Ball bearing lubrication. H. E. Adams. 501
Journal friction with boundary lubrication. Nordenholt & Chase....•109
Lubricant properties and their relation to design. Paul Gibbs....•153
Oil lubrication, principles and some simple methods. Herbert Chase...•57
Oil well for wick lubrication....•359
Small bearings and their lubrication. Herbert Chase....•406

Machinery:
Construction and mining equipment. F. E. Schmidt.... 444
Designing "jig-jogs." L. N. Stewart..•130
Electric motors, machine drives and controls. L. C. Morrow....•446
Equipment for the food industries. L. V. Burton.... 441
Farm machinery.... 448
Machinery for metal working industry. K. H. Condit....•438
Manufacturing equipment for nonmetal products. D. G. Woolf.... 440
Packaging food products....•453
Power plant and pumping machinery. E. C. Hutchinson.... 442
Process industries and oil field equipment. S. D. Kirkpatrick.... 444
Magnet, horseshoe-type electro....•279

Materials:
Beryllium copper....•364
Beryllium copper—cast condition....•494
Bills of material. P. Hall.... 259
Bills of material versus unit parts lists. M. W. Elmendorf....•300
Heat insulation with metal foil. J. L. Gregg....•204
Highly accurate parts from tin-base alloys. H. L. Spaunburg....•160
Hydraulic process plus new alloys for die castings. W. J. During....•376
Illium. W. D. Staley....•456
Materials, constructions, parts and finishes whose adoption is being contemplated.... 450
Materials for stampings. J. K. Olsen.•293
Materials in ships. W. E. Blewett, Jr....•229
Molded metal powder products.... 405
New Beryllium alloy.... 56
New material uses....53, 146, 190, 234, 277, 318, 453, 478
Non-ferrous classification.... 257
Plywood as an engineering material..•415
Pros and cons on bills of material. L. L. Leach.... 300
Styrol plastics....•281
Where are we going with the new materials? G. S. Brady.... 22
Wrought beryllium copper for electrical parts and springs. K. G. Frank...•108

Mechanisms and Construction:
Applying glue. G. A. Swartz....•454
Change-gear mountings. Adam Fredericks....•324, •366
Charts for motor armatures. (Ref. Bk. Sheets).... 311
Clamping shoes and plugs. F. A. Firnhaber....•286
Lubrication of small bearings. Herbert Chase....•406
Metals: Machinery for metal working industry. K. H. Condit....•438
Meters: Liquid and gas flow meter.... 6
Micrometer uses light waves to insure accuracy.... 400
Microphone, self insulated condenser....•453
Microphones of various shapes.... 103
Milling machine....•279
Milling machine for small parts....•104
Mining equipment. F. E. Schmitt.... 444
Mirrors for stroboscopes....•319

Molding:
Molded metal powder products.... 405
Rolled moldings in product engineering. D. C. Bailey....•368
Molding press, self contained....•319
Motion, accelerated and rotary. (Ref. Bk. Sheets).... 351
Motion pictures—Projector for still-films..•318
Motion study in the design of production equipment. A. H. Mogensen....•213
Motion study in machine design. Robert Pash.... 420
Motion study in machine tool design. R. C. Bullar.... 379
Motro Boats. New York show....•116

Motors:
Are such motors available? J. A. Covington.... 215
Charts for motor armatures. (Ref. Bk. Sheets).... 311
Clock motor....•149
Coal dust for fuel.... 7
Comparison of squirrel cage rotors. J. V. Hunt....•408
Electric motors for liner "Normandie" 479
Electric motors, machine drives and controls. L. C. Morrow....•446
Motors and their controls—1 direct current apparatus....•238, 292, 372
Solenoid motor....•320
Solenoids and motors for flexible control....•491
Speed control by solenoid and rectifiers 398

Standardization greatly needed. Charles Harmon 37
Multiplying machine *193
Mutochrome optical system to determine color. I. J. Saxl *329
National Business Show 464
National Electric Light Assn.—Engineering trends 304
National Metal Congress 465
National Screw Thread Commission—meeting 383
Neon "Detector" lamps for Christmas trees. 478

Office equipment 101
Office equipment. N. C. Firth 438
Oil burners—Ninth Annual Oil Burner Show *218
Oil-field equipment. S. D. Kirkpatrick ... 444
Oil film pressures. J. A. Hall, L. J. Bradford *213
Oilers, results of tests on wick. J. I. Clower *212
Ore crushed by explosion 102

Package is part of the product *168
Packaging food products *453

Paints:
Color — materials and behavior in products for outdoor service. F. G. Oswald *369
Color — materials and behavior in products for indoor service. F. G. Oswald 409
Parking, vertical *147

Parts and Units:
Bills of material versus unit parts lists. M. W. Elmendorf *300
Centrifugal clutches. McDonough & Niederer *337
Criteria for the design of bearings. L. J. Bradford 253
Dowel embossings for assembling stampings. J. K. Olsen *412
Economies in stampings. J. K. Olsen. *250
"Electric eye" *194
Evolution of tracts for high-speed tractors. C. G. Mettler *12
Hydraulic process plus new alloys for die castings. W. J. During *376
Low torque applications of ball bearings. D. E. Batesole *97
Month in product development—published monthly 1
Motors and their controls direct current apparatus *238, *292, *372
New applications of parts and units 103, 190, 234, 278, 317, 479
Parts and finishes whose adoption is being contemplated 450
Retaining and locking detents pt. 1. Adam Fredericks *486
Rolled moldings in product engineering. D. C. Bailey *368
Solenoids and motors for flexible control *491
Styrol plastics *281
Temperature and pressure control equipment *334
Trends in product engineering. *5, *52, *101
Pasting machine with variable speed controls *397
Patent exposition 263
Patents—How patent rights are sold and rented. H. A. Toulmin, Jr. 488
Proposed patent law changes 176
Pearl essence 285
"Pendulum power unit" *320
Photo cell supercedes photo engraving ... *478
Photo-electric cell *194
Photo-engraving machine *193
Photo electric integrator for belt conveyor scale *54
Photostat paper. M. W. Elmendorf 379
Pins, hollow, designing. M. V. Zaustinsky. *341
Pipe fittings standards 177
Pipe, jacketed and fittings 6
Pipe sizes and horsepower for hydraulic systems. (Ref. Bk. Sheets) 163
Pistons—Rapid cooling piston design *320
Pitman roll with roller-bearing 399
Plant and building equipment. J. M. Carmody 447

Plastics:
Oil resistant plastic *144
Styrol plastics *281
Three new designs for plastics 399
Plating: Specifying plating 323
Plug, connector *360
Plugs and slamping shoes. F. A. Firnhaber *286
Plywood as an engineering material *415
Power plant and pumping machinery. E. C. Hutchinson 442
Preferred numbers. (Ref. Bk. Sheet) 431
Preferred numbers. R. E. Hellmund. *353, *401
Preferred numbers, fractional. (Ref. Bk. Sheet) 432
Pressure and temperature control equipment *334
Printing press for newspapers *235
Process industries and oil field equipment. S. D. Kirkpatrick 444

Product Development:
Big Ben Chime Alarm. W. S. Hawthorne *49
Budd-Micheline car—rubber tires on steel rails *165
Product design for the market 261
Product development. K. H. Condit 433
Product development status and trends. 448
Product Engineering 16

Product Expositions:
Knitting Arts Exhibition 217
New York's 1931 automobile salon. Herbert Chase *32
Ninth Annual Oil Burner Show *218
Packaging, Packing and Shipping Conference and Exposition *168
Patent expositions 263
B.M.A. trade show 262
Road machinery for 1932 ..... *71
Second National Aircraft Show *216
Three national shows—boats—heating and ventilating—canning machinery. *116
Projectors for still films *318
Propellers for "Miss America" *480

Pumps:
Automatic proportioning pump *398
Connecting rods for oil well pumps .. *357
Electric pump operates in gasoline 481
Radio: Police radio set *103
Radio Manufacturers Assn. Trade Show ... 262

Railway cars:
Bus can be operated on rails or highway *397
Car for transportation of transformers of welded construction *398
Equipped with axle-generator power plant *148
Rail car runs on pneumatic tires *277
Rail cars, rubber tires 53
Rail car with rubber tires—Bud Micheline car *165
With two tiers of seats at different levels *358
Range, electric, of stainless steel 360
Range, insulated coal 7
Reaming, indexing and drilling machine ... *399
Rectangle, solving the inscribed 36
Reference Book Sheets:
Accelerated linear motion 351
Bending moment, shear and reactions of a beam bearing a concentrated load 27
Breaking load of round wires 311
Chart for overhung shafts 121
Chart for two bearing shafts of uniform strength 122
Chart to determine horsepower for hydraulic systems 163
Comparison of hardness scales and tensile strength 512
Cone friction clutch chart 392
Fractional preferred numbers 432
Hardness conversion chart 511
Plate friction clutch chart 391
Positive roots of any quadratic equation 271
Preferred numbers 431
Rectangular wire springs 472
Rotary motion 352
Round wire springs 471
Shaft diameters based on the A.S.M.E. code 227
Spur gear tooth strength chart 75
Turns of banding wire for armature end windings 312
Display cases with conditioned air refrigeration 104
Refrigerator with radical changes 55
Regulator for constant tension 357
Research and Development:
Conveniences complicate cars for 1932. Herbert Chase 68
Ford V-8 engine design. G. F. Nordenholt *185
Performance, the only belt criterion. C. A. Norman *145
V-belt life, overload and pulley diameter. C. A. Norman *248
Return bend in petroleum cracking still .. *235
Rivet heads zinc coated 358
Road machinery for 1932 ..... *71
Road maintainer, tandem drive of *101
Rolled moldings. D. C. Bailey *368
Rotojector centrifugal *360
Rotors, comparison of squirrel cage. J. V. Hunt *408
Rubber: Developments in rubber 357
Rubber tire tests 363
Rudder, "servo" reduces ariplane pedal load. *481
Safe-cabinet *277
Safe, malleable iron *479
Salvage, making permanent 152
Scissors, electric *451
Screen, stabilizer for *318
Screen cloth rolled with tape measure 102
Screw, mounting adjustment. J. E. Hyler. *342
Screws: Tolerances for gages discussed at Commission meeting 383
Seals for shaft housings and bearings. L. L. Leach *123

Shafts:
Diameters based on the A.S.M.E. code (Ref. Book Sheet) 227
Mounting small sheaves. O. D. Horton. *257
Rational design of. Emory Kemler .. *207
Seals for shaft housings and bearings. L. L. Leach *123
Shear, magnetically operated. W. B. Dahm *339
Sheaves, mounting small. O. D. Horton ... *257
Ship stabilizer 235
Shock absorber *237
Shovel, stripping *5
Silver as an engineering material 411
Sizes and ratings as related to "preferred numbers." R. E. Hellmund *353; *401
Society for Promotion of Engineering Education:
Joins American Engineering Council .. 304
Society of Automotive Engineers:
Meeting discusses diesels 303
Solenoid and rectifiers control speed 398
Speed reducer: Heliocentric speed reducers. *317
Spindle mounting *359

Springs:
Belleville springs. W. W. Boyd *361
Errors in instrument springs 111
Rectangular wire springs (Ref. Bk. sheets) 472
Round wire springs (Ref. Bk. Sheet..) 471
Spiral spring calculation. I. B. Black. *172
Wrought beryllium copper for electrical parts and springs. K. G. Frank ... *108
Stabilizer for vibrator screen *318

Stampings:
Dowel embossing for assembling stampings. J. K. Olsen *412
Economies in stampings. J. K. Olsen. *250
Embossed hubs in stampings. J. K. Olsen *326
Materials for stampings. J. K. Olsen. *295
Vital variables in steel stampings ... *141

Standardization:
Accepted standards that are ignored. W. S. Brown 172
Bolt and nut standards . W. S. Brown 419
Bolt and nut standards not ignored. G. S. Case 299
Lettering standards. W. S. Brown ... 382
Lettering standards. A. W. Swain ... 420
Non-ferrous classification 257
Pipe fittings standards 177
Series of conferences 304
Sizes and ratings as related to "preferred numbers." R. E. Hellmund *353; *401
Standard lettering should be abolished. E. C. Shanks 340
Suggested standards for dimensioning drawings. E. C. Shanks 259
Taper standards not changed 263
Unnecessary accuracy 4
Wire and cable standards approved ... 344
Steamship funnels 6

Steel:
Corrosion-resistant steel 175
Materials in ships. W. E. Blewett, Jr. *229
Nickel clad steel 53
Stainless steel drying cylinders 7
Stainless steel for belt conveyors 478
Stainless steels. G. S. Brady 22
Vital variables in steel stampings ... *141
Stroboscopes, mirrors for *319
Stuffing boxes, designs of *25
Sweeper mounted on Tructractor *52
Tank car for cement *191
Taper pin applications. F. A. Firnhaber . *242
Taper standards not changes 263
Tapers. Dimensioning tapers. R. M. Gamble. *422
Tapping machine 5
Temperature controls for room-by-room .. 55
Temperature and pressure control equipment *334
Temple gun for rivet type gun 102
Textile industry's equipment. D. G. Woolf 440

Theoretical Analysis:
Bearings for spindles transmitting impact loads. D. B. Turcott *9
Bending stresses in curved bars. B. L. Lonngren *298
Consecutive tangential arcs. E. C. Shanks *482
Differential planetary gearing. L. S. Michael *125
Effect of fitting on plain bearings performance. L. J. Bradford *150
Effect of variable friction in differential brakes. G. W. Mork *197
Engagement pressures in band clutches and brakes. A. C. Rasmussen *60
Engagement pressure for brakes on hoists. A. C. Rasmussen *105
Graphical analysis of impact in mechanical movements. G. F. Nordenholt *273
Inertia forces in cam mechanisms. J. A. Hall *393; *458
Minimizing lost motion in mechanical transmissions. W. M. Pohl *1
Positive roots of any quadratic equation (Ref. Bk. Sheets) 271
Solving higher degree equations. N. W. Wickstrand 339
Temperature calculations for clutches and brakes. A. C. Rasmussen *282
Tooth contact in spur and helical gears. H. E. Kitchen *331
Thermostats with flexible shaft 357
"Thiokol," oil resistant plastic *144
Threaded pivots and bearings. Arthur Pestel *129

Time study:
Motion study in the design of production equipment. A. H. Mogenson .. *213
Motion study in machine design. Robert Pash 426
Motion study in machine tool design. R. C. Bullard 379
Reporter of idle time and the reasons. *400
Tin base alloys for highly accurate parts. H. L. Spaunburg *160
Tire, pneumatic rail *480

Tractors:
Air compressor mounted on tractor .. *318
Evolution of tracks for high speed tractors. C. G. Mettler *12
Four wheel drive tractor *236
Oil and dirt seal for tractor rear end. *280
Transmission train, backlash factor in. W. M. Pohl *1
Triangle problems. I. A. Hunting 35
Truck end gate *192

Trucks:
Cane cart with track laying running gear *52
Cummins Diesel powered truck sets endurance record *63

Dump car *52
Highway freighting truck 52
Low bed truck *237
Twin coach delivery auto *6
Typewriters: Sterling silver typewriters.... 7
Typewriters electrically operated 101
Vacuum cleaner, broom and dust mop..... *103
Valves:
Nitralloy plugs for valve *399
Radiator valve *317
Tight sealing, for tank car..... 55
Velocity and acceleration. G. F. Nordenholt *273
Vibrating screen mounting *193
Vibraction: Torsional vibration — how to prevent it. D. B. Turcott..... *79
Water mixer maintains temperature..... *480
Weights: Ticket printed with rapid weighing 55
Welding:
Loudspeaker oxwelded 399
Make it look the part. P. B. Swinton 255
Welding—the engineer can make it or break it. R. Kraus. .pt 1 *29; pt 2 *77
Wheel cushioning device *280
Wind tunnel for research in aeronautics ..*302
Wires:
Breaking load of round wires (Ref. Bk. Sheet) 311
Turns of banding wire for armature end windings. (Ref. Bk. Sheet) ... 312
Wood joints 54
Zinc alloys for die castings. W. J. During.*376
